विश्वविद्यालय अनुदान आयोग से अनुदान प्राप्त विश्वविद्यालयों में हिन्दी विभाग की स्थापना एवं उन्नयन हेतु दिग्दर्शिका

प्रस्तावना

वैश्वीकरण तथा भूमण्डलीकरण के युग में हिन्दी भाषा और साहित्य का संरक्षण एवं संवर्धन बहुत बड़ी चुनौती है। आज आवश्यकता इस बात की है कि हिन्दी भाषा और साहित्य को रोजगारोन्मुखी बनाया जाए। हिन्दी देश की अस्मिता की प्रतीक एवं साहित्य अमूल्य धरोहर है। भाषा और साहित्य के संरक्षण एवं संवर्धन की दिशा में भारत सरकार निरन्तर प्रयत्नशील है। विश्वविद्यालयों में हिन्दी विभाग की स्थापना एवं कार्यरत हिन्दी विभागों का उन्नयन इसी प्रयास की कड़ी है।

मानव संसाधन विकास मंत्रालय की हिन्दी सलाहकार समिति द्वारा 11वीं पंचवर्षीय योजना में विश्वविद्यालय अनुदान आयोग से अनुदान प्राप्त सभी विश्वविद्यालयों में हिन्दी विभाग की स्थापना एवं उन्नयन हेतु सिफारिश की गयी थी। फलस्वरूप आयोग 12वीं पंचवर्षीय योजना में सभी अनुदानित विश्वविद्यालयों में हिन्दी विभाग की स्थापना एवं उन्नयन द्वारा इसके कार्यान्वयन हेतु प्रयत्नशील है।

उद्देश्य

इस योजना का उद्देश्य विश्वविद्यालयों में हिन्दी विभाग की स्थापना एवं उन्नयन करना है, जिससे हिन्दी भाषा और साहित्य का बहुआयामी विकास एवं संवर्धन हो तथा वैश्वीकरण के युग में हिन्दी शिक्षा को समाजोपयोगी, रोजगारोन्मुखी बनाने के साथ अन्य भारतीय भाषाओं के साथ जोड़ा जा सके। वर्तमान परिप्रेक्ष्य में हिन्दी का अन्य भारतीय भाषाओं के साथ समन्वयन महती आवश्यकता है।

नवीन हिन्दी विभाग की स्थापना

आयोग से अनुदान प्राप्त जिन विश्वविद्यालयों में हिन्दी विभाग नहीं है, वहाँ हिन्दी विभागों की स्थापना करने के लिए अग्रलिखित शैक्षणिक एवं ढाँचागत व्यवस्थाएं आवश्यक होंगी।

He briefed the members with the background details about the evolution of Central University of Jammu which came to be established in October, 2009 but actually started functioning with Dr. S. S. Bioeria assuming the charge as the founder Vice-Chancellor on August 08, 2011. Dwelling upon the perspective, he said that till date, we were working with a bare minimum supporting staff and exuded confidence that we have now a body of eminent academicians from across the country and with that the University feels confident that its feet are firmly planted on the ground. Elaborating on various initiatives on academic activities, development of infrastructure, faculty placement, acquisition and possession of land and site preparation etc., presented a comprehensive review of the multifarious activities taken in hand by the Central University of Jammu in the last eight months.

Most of the members made opening remarks and generally congratulated the Vice-Chancellor and resolved to record appreciations for the work done within such a short period of time. The members expressed hope that if the tempo and quality of work is maintained, the University shall emerge as an eminent institution of higher learning. While participating in the discussion, members extended their support and offered to contribute to make the University a Centre of Excellence, providing for academic and professional growth with empowerment of the youth.

Describing their association with an upcoming new university to be a huge opportunity to contribute right from the beginning to the establishment of a famed University, the members expressed happiness to be part of this exciting journey.

Members also put forth their suggestions regarding -

- a) Designing/formulation of syllabus on scientific and rational basis
- b) Blending conventional and corporate knowledge which is market oriented.
- c) Including existing scheme of courses and non conventional courses to provide for effective students placement.

00004

- d) Devising policy and programmes which support for professional development to be a good teacher;
- e) Laying emphasis on faculty recruitment which is critical to build up any of the University need to be carefully done with engagement/involvement of eminent expert in the field.
- f) Evolving effective recruitment strategies such as to provide for housing facility and incentive to attract good faculty when recruitment is made in the newly established universities.

Vice-Chancellor asked the worthy members to identify eminent and outstanding scholars who are available and willing for engagement as faculty. This shall be a great support to the University.

Thereafter, the agenda items were taken up for discussion.

Note:

The passed out students of Mathematics' department have informed that their applications for the posts of Assistant Professors in higher education department have been screened out and they are declared ineligible against them by Public Service Commission (PSC) as their qualifying degrees are M.Sc. Applied Mathematics and not M.Sc. Mathematics.

The students from the past batches have also complained that their employment opportunities in the state lower (10+2) and higher education departments are Nil as their degree is not considered to earn them eligibility for Assistant Professors positions in Higher Education Departments of Jammu and Kashmir State.

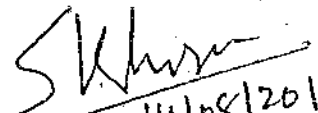

The passed out students have alleged that their careers are spoiled by this decision of the University to impart them degrees in M.Sc. Applied Mathematics. The students of the present semesters have appealed for changing the nomenclature of the degree from "M.Sc. Applied Mathematics" to "M.Sc. Mathematics".

This issue was discussed in the meeting of the staff council held in the Office of Head on 12-08-2017 at 3:00 pm at Central University of Jammu Bagla Campus. After threadbare discussions and by taking the overall content of the Mathematics syllabi of M.Sc. Applied Mathematics programme of Central University of Jammu and M.Sc. Mathematics syllabus of University Grants Commission into consideration it was revealed that there is 100% overlap. Besides a comparison with the syllabus of Jammu University reveals that it has ninety percent overlap with the present syllabus of Central University of Jammu.

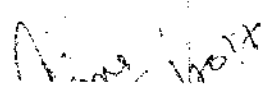

It was also pointed out that outside Universities that offer Masters Degree in Applied Mathematics have a three years programme and offer students lateral exit after two years with a degree of M.Sc. Mathematics. Infact a student is offered M.Sc. Mathematics after two years and then M.Sc. Applied Mathematics if he opts to continue in the programme and complete it after three years. The staff council therefore unanimously decided that since the Post Graduate (P.G) Mathematics course is only of four semesters, the nomenclature of the degree of "M.Sc. Applied Mathematics" be changed to "M.Sc. Mathematics". This is also necessitated by the fact that the department has only constituted Board of Studies in Mathematics since its inception that has approved the courses. It has not constituted Board of Studies in Applied Mathematics.

In the light of the above facts it is requested to change the nomenclature of the degree from "M.Sc. Applied Mathematics" to "M.Sc. Mathematics". The minutes of the staff council and the University Grants Commission syllabus is attached for your perusal.

If approved this proposal be discussed in the forthcoming meeting of the academic council.

Minutes of the meeting of the staff council held in the office of the Head, Department of Mathematics, Central University of Jammu, Raya-Suchani (Bagla), Samba on 11-08-2017 at 3:00 PM.

Members present:

1. Prof. S K Khosa, Head, Department of Mathematics, CUJ
2. Dr. Pavinder Singh, Assistant Professor, Department of Mathematics, CUJ
3. Dr. Deep Singh, Assistant Professor, Department of Mathematics, CUJ
4. Dr. Kamlesh Kumar, Assistant Professor, Department of Mathematics, CUJ
5. Dr. Sumeet Kumar Sharma, Assistant Professor, Department of Mathematics, CUJ

At the very outset the head of the department welcome the members to the first faculty meeting held at Raya-Suchani (Bagla), University Campus, CUJ after shifting the department from the temporary academic block, Sainik colony, Jammu. The head of the department requested the members to apprise him about the difficulties they are facing in the discharge of their academic obligations and requested them to come up with the suggestions to overcome the difficulties so that the academic work of the department could be conducted smoothly. The members informed the head of department that they are facing the following difficulties:

1. There is a need to install a number of wall fans in the lecture halls besides the partitioning of lecture halls. There are two lecture halls in the department for which at least 16 wall fans will be required.
2. Both the lecture halls need to be provided with dice for making writing boards accessible to the teacher while delivering the lecture.
3. For providing hygienic conditions, there is a need to install water purifier and a water cooler for the students, research scholars, faculty members and non-teaching staff totaling around 90 persons.
4. Blinders for two classrooms and faculty offices.
5. 2 big dustbins for classrooms and 5 small dustbins for faculty/non-teaching staff.
6. Internet facility for students, research scholars and faculty members.
7. Installation of coolers in the faculty offices.
8. Faculty chairs and chairs for faculty offices.

The Head of the department inform the faculty members that he had received a representation from the students of M. A/M. Sc Applied Mathematics requesting him to change the nomenclature of the master's degree that is awarded to these students from "M. A/M. Sc Applied Mathematics" to "M. A/M. Sc Mathematics".

This request of the students discussed threadbare in the department. After looking into the grievances raised by the students wherein they had complained that their applications for the post of Assistant Professor in the lower and higher education departments of the J&K Govt. were not considered by the state Public Service Commission as they did not recognise the M. A/M. Sc Applied Mathematics degree to be equivalent to the M. A/M. Sc. Mathematics degree resulting in making them ineligible for the posts advertised by the Public Service Commission and this they had

S. Khosla (12/8/17)

said has been happening for the last so many years and all the students who have qualified M A/M. Sc Applied Mathematics from this department of the University have not got employment in the state advertised teaching and research positions. It was also found that the syllabus of M. A/ M. Sc Mathematics that is notified by UGC has 100% overlap with the syllabus that is taught to the students of our university which means that the degree awarded by the Central University of Jammu based on the syllabi covered by the CUJ students should have been M. A/M. Sc Mathematics rather than M. A/M. Sc Applied Mathematics.

Further, it was realised that M. Sc. Tech. (Industrial Mathematics with Computer Applications) offered by UGC has a duration of 3 years with an exit option at the end of 2 years for which the students is awarded M. A/ M. Sc. Mathematics degree and, if the student completes the full 3 years programme, then in addition he is awarded M. Sc. Tech. In the light of this, the department council very strongly recommends changing the nomenclature of the degree from M. A/M. Sc. Applied Mathematics to M. A/ M. Sc. Mathematics.

The meeting ended with formal vote of thanks.

FOREWORD

Renewing and updating of the Curriculum is the essential ingredient of any vibrant university academic system. There ought to be a dynamic Curriculum with necessary additions and changes introduced in it from time to time by the respective university with a prime objective to maintain updated Curriculum and also providing therein inputs to take care of fast paced development in the knowledge of the subject concerned. Revising the Curriculum should be a continuous process to provide an updated education to the students at large.

Leaving a few, there have been many universities where this exercise has not been done for years together and it is not uncommon to find universities maintaining, practicing and teaching still on the Curriculum as old as few years or even more than a decade. Not going through the reasons for this inertia, the University Grants Commission, realising the need in this context and in relevance to its mandate of coordinating and maintaining standard of higher education, decided to adopt a pro-active role to facilitate this change and to ensure that the university Curriculum are soon updated to provide a standard education all over the country.

Curriculum Development Committee for each subject was constituted with the respective Convenor as its nodal person. The Committee besides having five subject experts drawn from the university system, was given a wider representation of various sub subject experts attending meetings of the Committee as the esteemed co-opted members which kept on changing from time to time as the need arose. The Committees, therefore, had representations from a large number of experts and had many meetings before final updated Model Curricula were presented to UGC.

The University Grants Commission and I as its Chairman are grateful to the nodal persons, a large number of permanent and co-opted members in different subjects and their sub disciplines for having worked seriously with committed devotion to have produced a UGC Model Curriculum in 32 subjects within a record period of 18 months.

The exercise would not have been possible without the support of our entire academic community. We can only hope that the results will fulfil their expectations and also those of university community and Indian society.

The UGC Model Curriculum has been produced to take care of the lacuna, defects/shortcomings in the existing Curricula in certain universities, to develop a new Model Curriculum aiming to produce the one which is compatible in tune with recent development in the subject, to introduce innovative concepts, to provide a multi disciplinary profile and to allow a flexible cafeteria like approach including initiating new papers to cater to frontier development in the concerned subject.

The recommendations have been compiled by panels of experts drawn from across the country. They have attempted to combine the practical requirements of teaching in the Indian academic context with the need to observe high standards to provide knowledge in the frontier areas of their disciplines. It has also been aimed to combine the goals and parameters of global knowledge with pride in the Indian heritage and Indian contribution in this context.

Today all knowledge is interdisciplinary. This has been duly considered. Flexible and interactive models have been presented for the universities to extend them further as they would like. ~~Each institution may have to work out certain uniform structures for courses at the same level, so that effective interaction between subjects and faculties is possible.~~ The tendency across the country is now to move from the annual to the semester system, and from award of marks to award of credits. There is perceptible growing interest in modular framing as well.

The recommendations while taking all these features into account, have also made provisions for institutions who may not be in a position to undertake radical structural reform immediately. In any country, especially one as large and varied as India, academic institutions must be allowed enough autonomy and freedom of action to frame courses according to specific needs. The recommendations of the Curriculum Development Committees are meant to reinforce this. The purpose of our exercise has been to provide a broad common framework for exchange, mobility and free dialogue across the entire Indian academic community. These recommendations are made in a spirit of openness and continuous improvement.

To meet the need and requirement of the society and in order to enhance the quality and standards of education, updating and restructuring of the curriculum must continue as a perpetual process. Accordingly, the University Grants Commission constituted the Curriculum Development Committees. If you need to seek any clarification, you may contact Dr. (Mrs.) Renu Batra, UGC Deputy Secretary and Coordinator of CDC who shall accordingly respond to you after due consultation with the respective nodal person of the concerned subject.

The University Grants Commission feels immense pleasure in forwarding this Model Curriculum to the Hon'ble Registrars of all Universities with a request to get its copies made to be forwarded also to the concerned Deans and Heads of Departments requesting them to initiate an early action to get their Curriculum updated. The University Grants Commission Model Curricula is being presented to the Registrar of the university with options either to adopt it in toto or adopt it after making necessary amendments or to adopt it after necessary deletion/addition or to adopt it after making any change whatsoever which the university may consider right. This UGC Model Curriculum has been provided to the universities only to serve as a base and to facilitate the whole exercise of updating the Curriculum soon.

May I request Hon'ble Vice Chancellor and the Hon'ble Registrar including the esteemed Deans, Heads of Departments, Members of the Faculty, Board of Studies and Academic Council of the Universities to kindly update their Curriculum in each of the 32 subjects in consultation with Model Curriculum provided here. This has to be done and must be done soon. May I request the Academic administration of the universities to kindly process it immediately so that an updated Curriculum is adopted by the university latest by July, 2002.

The University Grants Commission requests the Hon'ble Registrars to confirm that this time bound exercise has been done and send a copy of the university's updated Curriculum in each subject to UGC by July 31, 2002. It is a must. It has to be done timely, failing which, the UGC may be forced to take an appropriate unpleasant action against the concerned university.

The UGC looks forward for your active participation in this joint venture to improve the standards to achieve excellence in higher education.

PREFACE

The University Grants Commission constituted the Curriculum Development Committee in February 2001 for updating/framing the curricula in Mathematics at the undergraduate and post-graduate levels. In addition to recommending Syllabi for various courses, the Committee was asked to consider issues like multidisciplinary skills, linking the general studies with professional courses, introduction of bridge courses etc. allowing both the vertical and horizontal academic mobility. These are perfectly in tune with what Professor David Hilbert, one of the founder fathers of modern mathematics, had once posed at an international gathering of mathematicians— "What particular goals will there be toward which the leading mathematical spirits of coming generations will strive for?" Mathematics deals with changes and complexity of the natural and social world. The abstractions such as relationships, measure, pattern, order etc. which the mental organizing systems have to perform can be seen as prototypes of roots of mathematical ideas. The search for symmetries and regularities in the structure of the world continues to stay in the core of the pure mathematics. These symmetric patterns discovered by mathematicians quite often give birth to new technologies of great importance to human beings. One such example is that of X-ray tomography (CAT Scan). The generation of perfect codes has its clue in the arithmetic over prime numbers. Designs of large economically efficient networks of high connectivity owe its roots in the infinite dimensional representation of groups. Advanced Computer Graphics, visualization, and computer assisted design technologies grew due to basic mathematics developed to understand surfaces, matrices and certain types of geometries. These developments enabled Boeing to roll out its 777 jumbojet without ever building a mockup. Not only millions of dollars were saved but new standards for safety and reliability were also set. There is a wide class of problems typically coming from experimental sciences such as Chemistry, environmental sciences, earth sciences, medical sciences etc. where one has to deal with large amounts of loosely structured data. To make a breakthrough in tackling them one needs radical theoretical ideas, as well as new ways of doing mathematics with computers and a more closer collaboration with experimental scientists in order to match mathematical theories with available experimental data. Both the theoretical and industrial inputs of these developments are enormous and clearly visible today. These make the goal clear. Today students need thorough knowledge of fundamental principles, methods, results, and a clear perception of the enormous power of mathematical ideas and tools and knowhow to use them in all the three phases viz., modeling, solving and interpreting. The committee has made sincere efforts to recommend Syllabi which may enable a student to catch the right track.

I record my grateful thanks to all the hon'ble members of the Committee who have contributed to the framing of the recommended syllabi. A number of Professors from various universities and persons having industrial experience were consulted and we are grateful to all of them for their suggestions.

Finally, the Committee expresses its appreciation for the assistance provided by Dr. A.K. Parate, Deputy Secretary, University Grants Commission, and his office staff for completing this task.

About the Above Programs

In all the above programs there are Core Courses and Optional papers. The time required for covering each paper is explicitly mentioned. The topics recommended (parts a and b) in the Syllabi of the various papers can be covered in two semesters. But we have not explicitly separated the parts a and b. Consider, for example, the Course MM 401 (a & b) Advanced Abstract Algebra. The universities following semester system can divide the contents into two parts a and b according to their convenience and teach part a in one semester and part b in the next semester. There are one Semester Courses as well. The teaching program is expected to be supplemented by tutorials, problem solving sessions, seminars and group discussions.

It is recommended that each paper be further divided into Sections and questions from each Section be asked so as to ensure that the student has actually studied all the topics. In order to test the grasp of the underlying principles in the various topics, objective type questions and questions having short answers covering the entire syllabus may be asked.

The M.A./M.Sc. program is so designed that students from both B.A./B.Sc. (Honours) and B.A./B.Sc. (General) streams can study its various papers without much difficulty.

Inclusion of Computer Science Courses in B.A./B.Sc. and M.A./M.Sc. programs has several advantages. Students offering these courses will be in demand in Industry and shall get preference in teaching and research institutions.

A student after obtaining M.Sc. Tech (Industrial Mathematics with Computer Applications) degree is expected to be absorbed immediately in the Industry. Persons with M.Sc. Tech (Industrial Mathematics with Computer Applications) degree shall be considered to be holding a degree higher than M.A./M.Sc. (Mathematics) two year degree of any Indian University and they shall be eligible for appointment on all teaching, research and other positions where M.A./M.Sc.

129.	Mumtaz (Mumtazul Mohaddisin, Adab etc.)	Tafseer, Mumtazul Fiqh, Mumtazul	M.PHIL.	1 year	Kamil (MA)

The universities shall be free to write English equivalent of these degrees, if they so desire in the mark sheet/degree certificates either in parentheses or slash.

Guiding Principles:

Degrees should be specified in generic terms and their nomenclatures should be such that are generally recognised, globally acknowledged and widely accepted and are indicative of the level of the degrees and the broad subject/ discipline/ knowledge area universities/institutions, in curricular innovation, shall have the freedom to indicate uniqueness/ specialisation in parentheses against the specified generic degrees.

Universities/institutions may introduce Integrated and Dual Degree Programmes judiciously and with caution. A dual degree programme combines more than one subject, mostly in a horizontal spread, whereas an Integrated Programme is progressive and cumulative. The academic philosophy/rationale behind offering such integrated programmes should not be for economising on course requirements or award of double degrees in a fast track; on the contrary, an integrated approach should involve a vertical/inter-disciplinary discourse. A dual degree should aim for a better comprehension of the related subjects of study from a multi-dimensional perspective. This would necessarily entail an equal, if not more, course duration and a newer approach of curricular transaction and additional interactive courses. Thus an Integrated/Dual Degree Programme combining two or more disciplines shall be permissible only if there is no compromise on any of the course requirements, viz. duration, number of papers and intensity of courses, teaching/learning hours, credits, etc. Integrated and Dual Degree Programmes are therefore, be introduced by the universities/ institutions subject to the following conditions:

- a) The Integrated/Dual Degree Programmes must not dilute the standards as prescribed under the Regulations made by the UGC and other Statutory authorities concerned in terms of syllabi, programme duration and examination requirements.
- b) If the Integrated/Dual Degree Programmes intend to offer two separate degrees with an option for an interim exit or lateral entry, the duration of the Integrated/Dual Degree Programme must not be less than the duration equal to the sum total of the prescribed duration of the two degrees that are being combined in the Integrated/Dual Degree Programme. Provided that all such programmes would carry the nomenclature of "Integrated/Dual Degree (name of the first degree) - (name of the final degree)". Provided further that both the degrees awarded under the Integrated/Dual Degree programme shall be individually and separately recognised as equivalent to corresponding degrees and not as one single integrated degree.
- c) If the Integrated Programme intends to offer a single degree without permission to exit and lateral entry, the programme duration may be relaxed by not more than 20% of the sum total of the prescribed duration of the two degrees that are being combined to make the single Integrated degree.

General Instructions:

1. All the changes in the nomenclature of the degrees, as notified herewith will come into effect from the date of their notification in the official Gazette.
2. The above specified degrees shall be awarded by a University established or Incorporated by or under a Central Act, a Provincial Act or a State Act or an institution deemed to be a University under section 3 or an institution specially empowered by an Act of Parliament to confer or grant degrees under section 22 of the UGC Act, 1956.

16. The UGC shall forward a copy of the order made under clause 14 above to the university concerned, and on and from the date of receipt of a copy of such order by the university, the affiliation of such an institution, so far as it relates to the course of study specified in such order, shall stand terminated. On and from the date of termination of such affiliation, and for the period of three years thereafter, approval shall not be granted to that institution to start such or similar degree or post-graduate degree programme.
17. Contravention of the provisions relating to the specification of degrees as above shall also render the defaulting university and affiliated colleges liable for action as deemed fit by the UGC.
